Manage Your Patient's Journey
Treatment Platform for the Home Setting

Fitango Health is an innovative platform that will substantially optimize your patients' treatment and recovery by offering them tools to elevate their education, medication adherence, and advanced communication through telemedicine and remote-patient monitoring.

Fitango Health Platform

Fitango Health is an oncology, post-acute platform for the home setting that can improve patients' recovery outcomes and reduce costs for providers.

By utilizing our innovative platform, patients will be:

- Guided through their treatment journey

- Tracked for optimal health

- Connected with clinical care teams through telemedicine components

- Accessed by care team members through remote-patient monitoring

The Fitango Health platform synchronizes data from an EMR/EHR system using the embedded HealthShare Connect™ application*.

Defining Your Oncology Process

Fitango Health understands the importance of a comprehensive post-discharge process for oncology events, such as:
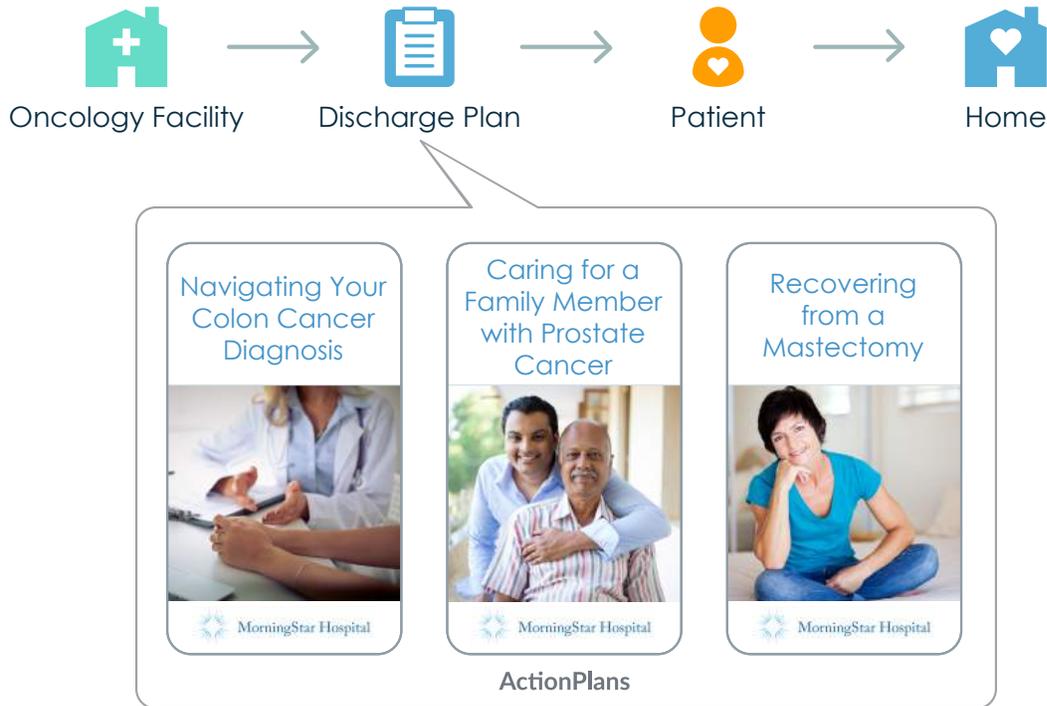

- Biopsy

- Tumorectomy

- Chemotherapy

The integrated solution allows care managers to effortlessly create and prescribe custom plans to patients, or their family members, with the ability to monitor their reported values. Care Plans include:

- ActionPlans

- Medication Plans

- Checklists

- Video Plans

*HealthShare Connect is a product of **InterSystems®**

Post-discharge Recovery Workflow

Discharge planners can now interactively empower cancer patients to get involved in their treatment process and foster an intuitive experience for patients to be supported in their path to improved health.

By building and assigning custom ActionPlans as part of the discharge process, the relationship with patients is active and personalized.

Oncology Facility → Discharge Plan → Patient → Home

Analytics & Outreach

Understand the changing health of your patient population:

- Stratify patient's risk with your own risk stratification models or utilize the built-in modules

- Use cohort management to improve care delivery while enhancing outreach

- Analyze the performance of your providers against patient's health data

- Receive and send real-time clinical data and alerts through integrations with EMR/EHR systems

Platform Key Facts

✔ Secure and HIPAA compliant

✔ Cloud-based, web, and mobile accessible

✔ White-label and customizable

✔ Embedded EMR/EHR interoperability using InterSystems HealthShare Connect™

✔ Open architecture

✔ Integrated telemedicine and remote-patient monitoring

✔ Rapid deployment, easy to use
