

## Engage the Whole Family in the Patient's Recovery

Offer the resources and education your patient's and their families need to go from healthcare to self-care™

## An Innovative Way to Engage Families

Fitango Health offers a unique solution to improve outcomes in pediatric health. The platform's comprehensive engagement and educational mechanism allows the patients, their family members, and their entire care team to reside on a single, integrated platform. By using the platform, your organization can extend the reach to the patients at home or in the community, while putting all those involved in the patient's health on the same page.

## Empowering the Family

The Fitango platform empowers not only your patients, but also their family members. To satisfy this, the platform provides a rich toolkit to enable a brand new patient and family experience:

- **Family Dashboard** - Family members will be able to connect with the system to view and report on the patient's care plans
- **Medication Management** - Manage the patient's medications and supplements with reminders
- **Biometric Tracking** - Customize and track more than 200 trackers with connection to any Bluetooth device
- **Health Education** - Resources focusing on health, safety and other preventive measures
- **Patient Alerts** - Alert the care team about events and set reminders for scheduled activities
- **ActionPlans** - Build, publish, and prescribe custom ActionPlans to patients and/or their family members to report on and stay engaged

## Post-discharge Recovery Workflow

Discharge planners can now interactively empower cancer patients to get involved in their treatment process and foster an intuitive experience for patients to be supported in their path to improved health.

By building and assigning custom ActionPlans as part of the discharge process, the relationship with patients is active and personalized.

### Platform Key Facts

- ✓ Secure and HIPAA compliant
- ✓ Cloud-based, web & mobile accessible
- ✓ White-label & customizable
- ✓ Embedded EMR/EHR interoperability using InterSystems HealthShare Connect™
- ✓ Open architecture
- ✓ Integrated telemedicine and remote-patient monitoring
- ✓ Rapid deployment & user friendly

## About Fitango Health

Fitango Health is redefining the intersection of technology and healthcare.

Our innovative and integrated digital platform enables your organization to utilize data, send secure messages, and assign plans to your population for the very best care and treatment outcomes while lowering risks and reducing cost.
